@author: KA CHI LO

Decription :
Enter the user's last name, number of dependents and gross income. Compute
adjusted gross income to be gross income minus dependents times $12000. Next
determine an income tax rate. Adjusted gross incomes over $50,000 have a tax
rate of 20%. Adjusted gross incomes $50,000 or under have a tax rate of 10%.
Once you determine the tax rate, compute income tax to be adjusted gross income
times tax rate. If the income tax is less than 0, set the income tax to $100.
Display last name, gross income, number of dependents, adjusted gross income,
and income tax.
