```python
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
"""
Created on Wed Apr 15 22:10:14 2026

@author: flkc
Description:
    Watch the video on creating a simple class. Create the class in the video and test it to mak
it works.
Add a method to the class that accepts a bonus rate for the employee. It should then compute
the employee bonus of rate x salary and return this value. Demonstrate this method works by
entering a bonus rate and displaying the bonus.
"""
