@author: flkc
Description:
    Enter the student's last name and 3 exam scores. Use a function to compute the average and
total points. This function should return both total points and average. Display student's last
name, total points and average exam score.
"""

def compute_scores(exam1, exam2, exam3):
    return (exam1 + exam2 + exam3), (exam1 + exam2 + exam3)/3
